IPC EAGLE IS COMPACT

See where IPC Eagle's compact line is able to clean.

SCHOOLS

The IPC Eagle compact line works great in schools. They are small enough to clean hallways, entryways, classrooms in between desks and even under the desks.

HEALTHCARE

The compact scrubbers can fit into the restrooms, lobbies, entryways and even patient rooms, helping to reduce time needed to clean all of the flooring in hospitals.

FITNESS CENTERS

The smaller scrubbers can clean gyms very easily with the ability to reach in between equipment and even under equipment. The scrubbers can be used to clean the entryways and locker rooms as well.

RESTAURANTS

You can use IPC Eagle's compact scrubbers to all floors in restaurants. The scrubbers can squeeze into the backrooms, the cooler spaces, in between tables, under tables and throughout the kitchen regardless of obstacles.

CONVENIENCE STORES

The compact line is ideal for convenience stores. The scrubbers can go behind the counters, in between the aisles, keep floors clean by the doors preventing mud from spreading throughout the store and to clean restroom floors.

CT5

The CT5 is one of the smallest and lightest automatic scrubbers on the market and is extremely portable with its lightweight design weighing only 44 pounds, including the battery and brush. The machine can be carried from room-to-room, or transported on a cleaning cart such as the Brix, making it perfect for cleaning restrooms, picking up spills, and cleaning wet and slippery entryways. Its small, compact size allows it to squeeze into many tight spaces, such as aisles or between tables, making it perfect for the retail sector and restaurants as well.

CT15

The CT15 is compact in size (14" cleaning path with a 4 gallon tank) but provides the high productivity and long battery run-times of a larger scrubber. It is perfect for areas where traditional scrubbers are too large.
