Operation

Maintenance and Care

Table with maintenance tasks and frequency (daily, weekly, monthly). Tasks include draining tanks, cleaning filter, squeegee, brushes, wheels, and exterior.

Checklist of maintenance tips: Clean filter/float regularly, Empty tank before storing, Leave rubber cap open, Close recovery tank cap, Do not kick deck with foot, Always switch off, Do not operate without filter/float, Do not use water with pH below 4 or above 9.

Troubleshooting

The imop won't start: Check battery level and connections. Insufficient water flow or no water flow: Check solution tank, filter, and water nozzles. Reset: Remove battery pack and put it back in again.
