## FACILITATES CLEANING, CONTRASTING THE BACTERIAL CONTAMINATION RISK.

If the risk of contamination and joint-muscle pains have always made the working conditions critical, from today it is possible to work safely thanks to the innovative SAFE T. It enables the operator to maintain a correct posture in any phase of work and to avoid the contact with the

mop both during the fixing and removal. Imagine being able to hook and unhook the mop in a few simple steps without ever folding or having to touch it. From today it is possible with Safe T, the new IPC frame equipped with a practical no-touch release system.

BY CHOOSING SAFE T, THE OPERATOR CHOOSES  
TO PRESERVE SAFETY AND HEALTH.

# PERFORMANT AND ERGONOMIC.

The innovative choice that battles the risk of contamination and at the same time ensures cleaning performances with particular attention to the health of the operator.

**SAFETY**

**ERGONOMICS**

**IONICS**

## SAFE T

### ADVANTAGES:

**HYGIENIC.** The quick coupling and release system allows to never touch the flat mop, that is released directly into the bin with the pushing movement present into the handle. The operator avoids therefore contact with bacteria, germs and dirt.

**ERGONOMIC.** Designed to work without ever bending down, the no-touch system allows to never have to bend while inserting and removing the mop. At the same time the operator maintains a correct posture during all cleaning phases, avoiding the onset of joint-muscle pain.

**FUNCTIONAL.** The possibility to combine a telescopic handle allows to adjust the most suitable height to facilitate movements during cleaning operations with obvious postural advantages, as well as greater ease of movement.

### BENEFITS:

**TIME SAVINGS.** With quick release system no-touch, mop replacement takes little time and cleaning operations result faster and more efficient.

**CORRECT POSTURE AT ALL TIMES.** No more difficult movements or uncomfortable positions to maintain: the Safe T frame has been designed around the operator safety's necessities.

**REDUCTION OF CROSS-CONTAMINATION.** The Safe T frame provides an advanced cleaning system that prevents the indirect passage of pathogenic microbes from contaminated surfaces to different one's, through hands or equipments.

**LOW ENVIRONMENTAL IMPACT.** Focus on sustainability and environmental awareness, the new Safe T frame has been designed and made with completely recyclable materials.

ATPA00214\* IP27 40 cm  
(single pack)

ATPA00239\* IP27 40 cm  
(pack 10 pieces)

\* The code includes the frame only. Handle is not included.

### RECOMMENDED HANDLES

	Code
ALUMINIUM	MANI00079 - 0009 ● / 0015 ●
ALUMINIUM TELESCOPIC	MANI00033 - 0009 ● / 0015 ●

### SUITABLE FLAT MOP REPLACEMENTS

	Code	Size [cm]
 HYGIENE	FRAN01264	40x13
 SPOT	FRAN01270	40x13
 COPO	FRAN00469	40x13
 SNOW	FRAN01258	40x13
 LOOP	FRAN01282	40x13
 GREY	FRAN00515	40x13

## TECHNICAL DATA

**LIGHTWEIGHT:** despite being made of strong and robust plastic materials, it weighs only 670 g.

**COMPACT:** can be used with either a telescopic or normal handle. Can be easily transported even in smaller vehicles.

**EASY TO CLEAN:** thanks to the absence of interstitial spaces where dirt could accumulate, the frame is easy and quick to clean.

**PRACTICAL:** simplified snap-on handle insertion to facilitate hooking and unhooking operations reducing time and effort.

**HIGH-QUALITY MATERIALS:** made of robust, shockproof materials that are resistant to water, chemicals and UV rays.

**REPLACEMENT TYPE:** suitable for replacement mops with pockets, both disposable and in 40 cm microfibre. Also suitable for the pre-impregnation method.
